

# AI Workflows for Accounts Payable

## Automatically match POs, Invoices, and GL codes

Finance teams waste weeks matching POs, processing invoices, and classifying expenses, leading to:

-  Late Payments
-  Wasted Resources
-  Errors & Restatements

## Workflows collect, analyze, and act **AUTOMATICALLY**

-  Match POs, Invoices, and GL codes
-  Categorize expenditures by type and department
-  Flag exceptions & suspicious transactions for review

## Use AI to **accelerate** and optimize

-  Digitize PDF/Excel/Word files into structured tables
-  Auto-assign GL codes to PO line items via Chart of Accounts
-  Validate invoice, match to PO, auto-assign exceptions

## Accounts Payable that **scales**

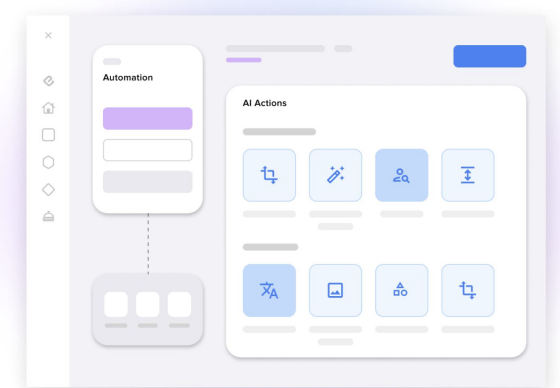

- Analyze and validate every PO/invoice automatically
- Assign exceptions/risks and track to resolution
- Centralize docs and collaboration for transparency & audibility

## Automate with **no integrations** and **no code**

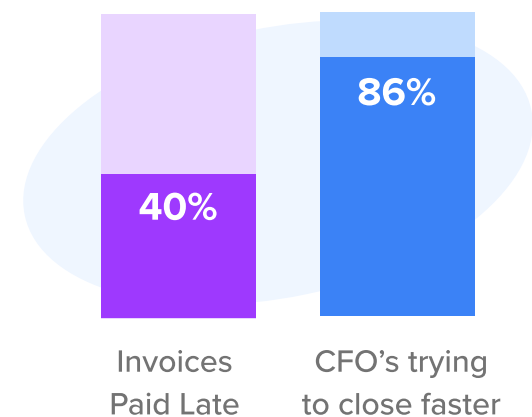

Get started in less than 30 days

- 1- Select AP app in Marketplace
- 2- Select relevant Snowflake tables
- 3- Choose AI & ML models
- 4- Personalize workflows, approvals, and reports
- 5- Customize escalation and approval workflows

**Faster, Smarter, Cheaper**

**Save Time**

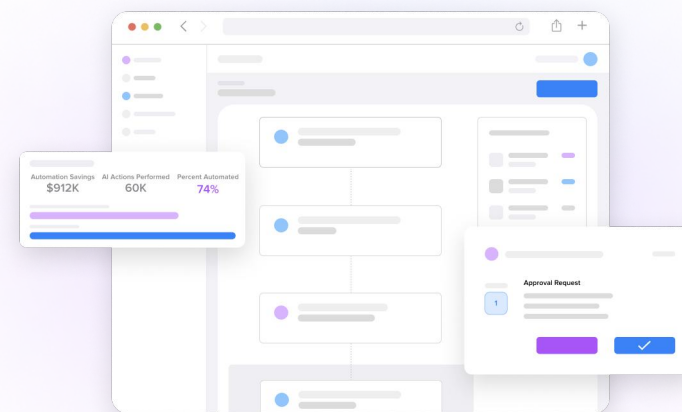

**Reduce Risk:  
2021 - 2023**

**+2.5x**  
Accounting  
Errors

**+2.9x**  
Restatements

# Example: Accounts Payable Automation

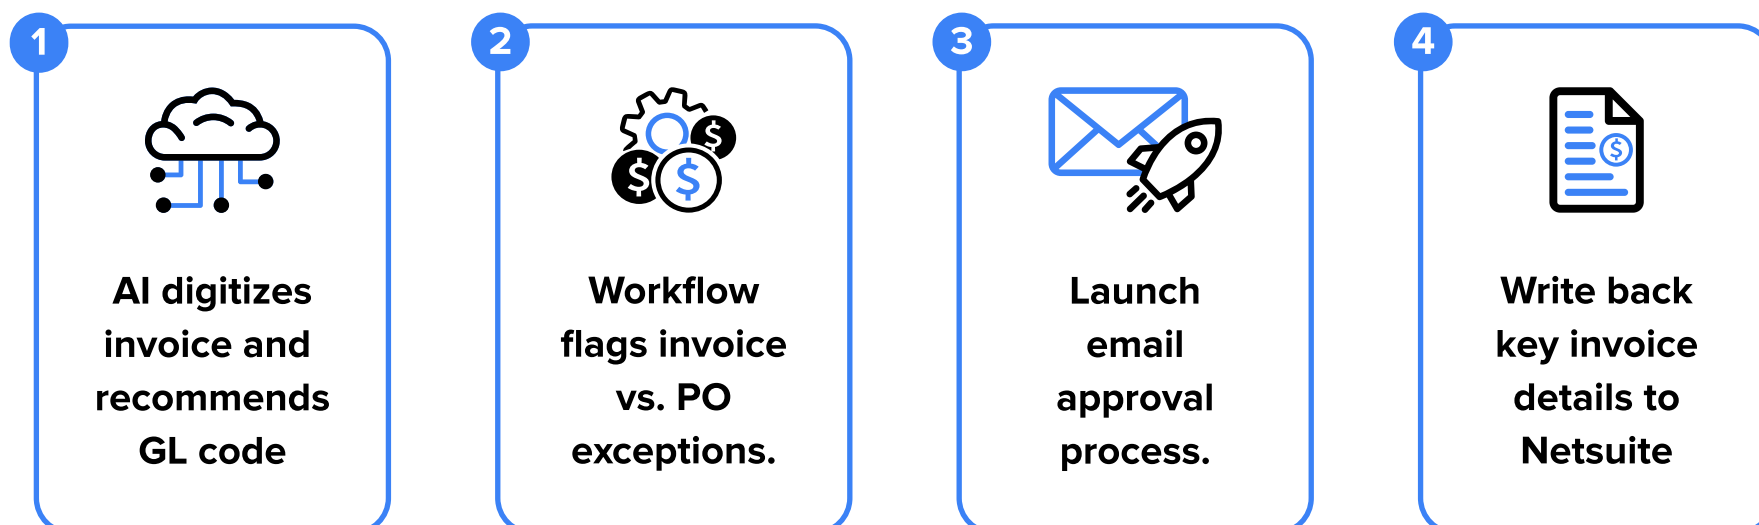

Save 250 hours & \$15k per 1000 invoices

## Managing invoices was inefficient and error-prone

A multinational corporation's processes were:

- **Manual:** Validating POs, matching invoices, and coding expenses individually
- **Fragmented:** Using email, Excel as band-aids for Coupa
- **Unreliable:** Inconsistent GL classifications leading to audits and rework

## 250 hours reclaimed per 1,000 invoices

With AI Driven Workflows, processes are:

- **Automated:** AI-powered PO matching and validation
- **Intelligent:** Smart GL classification and coding
- **Efficient:** Proactive fraud detection and exception management
